

大型中空料粉碎机

LARGE HOLLOW MATERIAL CRUSHER

八字刀 Bazi knife

交错刀 Staggered knife

大体积 直接破碎 Large volume directly broken

此款大型中空料粉碎机是一种破碎功能强大的多用途机器，主要用作破碎各种软硬塑料，将块状、球状、条状及水口塑胶粉碎成颗粒，对塑胶次品、废品、水口料的迅速回收起到重要作用，提高塑胶的利用率。其既可做线机边粉碎机，置于主机边；也可做某生产区域线下集中处理粉碎机。

PC series of POWERFUL GRANULATORS with multi applications. Its main function is to crush all kinds of hard and soft plastics, grind block, round or strip shaped and outlet plastic into granules. It plays a vital role in prompt recycling and processing of plastic scrap, waste and recycling materials, enhancing the utilization of plastic. It can be installed beside the main machine to crush recycled materials during the operation of the main machine. It can also be used to crush centralized materials collected from a production line.

机器特点 >>

- 切削刀具采用高铬工具钢，间隙可调，经久耐用。
 - 超大惯性轮使扭矩加大，产能提高。
 - 电机过载保护，过力跳脱。
 - 安全装置锁设计，保护机器和人员安全。
 - 斜切削双剪切式切削有效减少粉尘及节能。
 - 重荷型轴承及防尘装置，并有隔音隔板，能有效地防止震动和噪音。
 - 拆装式设计，易于维护保养。
- Cutting tools made of high chromium tool steel, gap adjustable and durable.
 - Large flywheels to increase the torque and capacity.
 - Motor designed with overload protection, which automatically shut down when it enters protection mode.
 - Interlock safety device designed to protect the machine and operator.
 - Oblique cutting and double shear cutting effectively reduces dust and saves energy.
 - Heavy load bearing and dust-proof devices, together with sound-proof partitions, can effectively prevent vibration and noise.
 - Equipped with castors, easy to move.
 - Detachable design for easy maintenance.
